Willoughby

Sydney, Australia

Rebuild & Renovation Villa Project

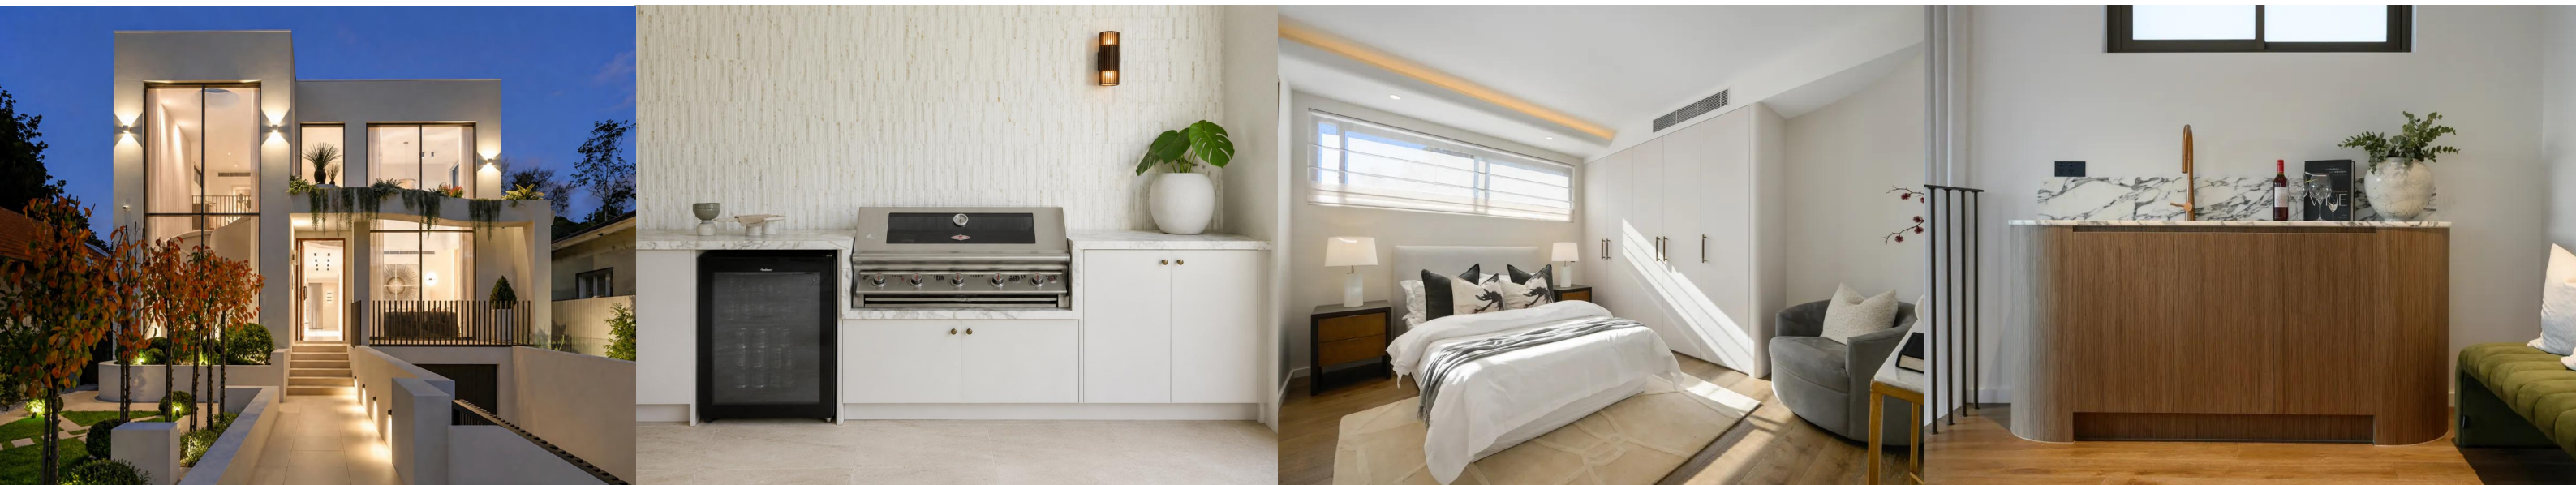

Contemporary Luxury Style

Project Description

This completed project in Willoughby, Sydney's Lower North Shore, features a bright two-storey contemporary interior. Soft-touch melamine panels form the main material palette, paired with slim aluminium-framed glass doors for added lightness and depth. Wall-mounted floating walk-in robes, refined wood textures, metal-and-glass detailing and concealed storage create a clean contemporary luxury aesthetic, while durable, easy-care finishes suit Australian conditions and integrate seamlessly with the architecture.

Design Highlights

The custom walk-in robe combines curved transitions, slim aluminium-framed glass doors and warm timber finishes. Curved openings soften the linear cabinetry, while black metal details and recessed warm lighting enhance contrast and depth. Modular hanging, drawer, shelving and display zones provide efficient storage while maintaining a clean, airy and refined bespoke aesthetic.
